### The corners of our library

The American Corner opened officially in 2005 upon the request of the USA Embassy in İzmir University of Economics library is a part of the application of the USA Information Offices. These applications executed by the U.S. Department of State are carried out in universities of various countries, public libraries or chambers of commerce. The aim of the information communications offices is to help the ones who wish to get information about the American culture, history and education system by directing them to the right source of information. The Information Office established at our library aims to present resources for the people in İzmir as well as our students in order to get information about American culture and education system. Another similar establishment at our library is the Greek corner. The Greek Corner established with the personal attempt of the former Greek consul gives service in the same way. We are waiting for the ones who are curious and who want to look through these different windows.
